

A Proud Tradition of SUPERIOR Innovation!

The NEW STL008 5R110W Internal Upgrade Kit

PART# STL008

- Super-sized Direct Drum Bushing (patent pending) state-of-the-art design
- Metering orifice prevents unrestrained lube dump to balance piston & provides back-pressure which, when combined with optimized axial lube channels, creates a lube pump to deliver ATF to stator sleeve so bushing can hydroplane on the sleeve
- A new hi-tech CT-101 Dry Film Lubricant coating provides reduced frictional coefficient and increased lubricity for improved break-in, extended life, and durability
- The tight installed fit and close bushing to sleeve clearance virtually eliminates drum rock and prevents bushing spin-out
- Oversized bronze filled carbon graphite lap-joint direct drum sealing rings .015" wider and more flexible than OE PEEK rings, conforms to groove irregularities
- End play shim for reduced clearance provides axial support to reduce "rocking" that causes forward drum bushing elongation and front to rear movement that unseats direct drum sealing rings
- Solid Teflon® forward clutch sealing rings
- As a bonus you also get the Superior Low reverse SuperTuff® & forward clutch H.D. snap rings, the end play shim for the center support and the lube feed cup plug to confidently clear the lube hole in the center support that is often debris fouled and plugged.

Join the thousands of transmission technicians who have already made the shift to Superior Transmission Parts. From coast to coast, builders are discovering what a difference the Superior Alternative can make – with better performance and fewer comebacks.

Easy To Install – Clearly written, easy to understand instructions, along with accurate illustrations make installations of our Shift Correction Packages® a breeze.

Quality Parts – All Superior valve body products are made in America with first quality materials and manufactured to the industry's most exacting standards. Precision engineering and state-of-the-art manufacturing techniques deliver a top quality product.

Consistent Performance – Tested and retested, Shift Correction Packages®, Fairbanks Performance® products, and Superior Solutions® offer the simple solution to many OEM design flaws and deliver increase performance in today's most popular transmission models. Our valve body products work – that's the secret to our success.
