

SUPERIOR Innovation!

USE THE STL-RE5 AND SAVE MONEY THE EASY WAY!

The **STL-RE5** Valve Body Upgrade Package

Superior's new TransLab Engineered® part # STL-RE5 fits/services all 2004-up RE5R01/5A Nissan and Infinity units. Our proprietary and patent pending Flow-Control™ Valve System and TCC/Lock-up circuit upgrades will allow you to tackle this complaint plagued unit with confidence.

Utilizing TransLab Engineered® new proprietary Flow-Control™ valve system we virtually eliminated the "weak, soft slide-bump shift feel" and cleaned up the long/slide shifts, slips and flairs without making the shifts harsh. This unique function was designed to control shift feel thru the valve itself. Other common complaints found with this unit are the over pressurization of the cooler circuit, 4-5 slip/5-4 neutralizations and stabilizing the P.R. circuit which the kit also addresses. The kit also comes with new nickel coated sealing rings to address the 2-3 slip/flair issues and include our new TCC boost valve and sleeve for better control over lock-up slip and shudder.

Let's face it... The time is NOW to start making more bottom line dollars that stay in YOUR shop and keep your customers happy. It's 2017 and we need to look deeper at fixing the electronics in the shop and on the bench. The days of Power Glides, C4's and Jatco 3N71B's are long gone and with technical seminars, training and video resources readily available...Gain confidence and take action...Install our New STL-RE5 TransLab Engineered® from Superior Transmission Parts, Inc. valve body upgrade kit on your next RE5R01/5A unit.

K0108 SuperTuff® Snap Ring

Part # K0108
Reverse Brake
SuperTuff®
Nissan
